

# Our daily activities provide the base

All VINCI Energies employees endorse the VINCI Group's CSR principles.

The VINCI Group, of which VINCI Energies forms part, like other companies, is a signatory to the UN Global Compact. Under this Compact, companies assume responsibility for promoting the sustainability of the planet, society and companies by inspiring, setting a good example and by supporting other organisations in this regard. Companies formulate a number of guidelines and objectives for this purpose. These objectives not only concern the environment and energy issues, as is often assumed, but, for example, risk management, social policy, financial policy, the supply chain and good governance as well. It is not without obligation: participating companies regularly report on their progress in achieving their objectives. VINCI does this in its Annual Report.
