## An agile partner to the industrial sector

Being agile enables you to take steps and

decisions in response to market requirements. However, you also have to remain highly dynamic. Only then you can vouch for progress or speed up developments. After all, without movement everything stands still.

Actemium possesses all the knowledge, skills and experience required to assist clients in the industrial sector in the design, construction and maintenance of their production processes. Furthermore, our global business-unit structure enables us to cater effectively to their exact needs, literally wherever and whenever necessary. This makes us an agile market player. In all sectors and throughout the world.

## Manage Movement

Without movement, everything stands still. Agility is key, also in the consultancy, engineering, realization, commissioning and maintenance of industrial installations. Committing and managing the appropriate expertise at the right time, all over the world. Responding flexibly to changes. Constantly seeking innovative *Solutions & Services* that will improve your processes. We call it *Manage Movement*.

## A dynamic network

The network of Actemium counts 20,000 specialists and 300 business units in 40 countries. In the Netherlands, 850 enterprising professionals, working from 23 business units, bring movement to industry.

We serve clients active in a broad range of industries, including oil & gas, food, brewery & beverage, feed, chemicals and pharmacy, wholesale & distribution and manufacturing.

Our profound expertise: consultancy, process control & automation, (multidisciplinary) engineering, panel build, assembly, logistic solutions, maintenance & service and major projects.
